

Lightning **Electric** Class 6 Low Cab Forward

- ✓ Battery-electric vehicle
- ✓ Smooth and quick
- ✓ Zero emissions
- ✓ Available with a variety of ranges and wheelbases
- ✓ Installation, maintenance and service performed by certified partners

The **Lightning Electric Class 6 Low Cab Forward truck** is equipped with a sophisticated electric drivetrain which provides a quiet, smooth and familiar driving experience. The generous payload capacity makes this vehicle perfect for urban logistics and deliveries.

Active thermal management of the batteries ensures the best range, the best efficiency and longest operational lifetime.

Available in ranges from 88 miles to 130 miles, this truck delivers practical, reliable service while producing zero emissions on the road. DC Fast Charge provides the fastest charging available.

Lightning's team of fleet experts stand behind our work and provide exceptional customer service, from vehicle deployment and technical support to custom analytics reports and operator training.

Let us put you in the driver's seat!

All Electric Range*	88 miles	110 miles	130 miles
Battery Capacity	122 kWh	153 kWh	184 kWh
Charge Time	1.5 hour (Level 3)	2 hours (Level 3)	2.25 hours (Level 3)
Payload and Passenger Capacity**	13,650 lbs 3 passengers	13,140 lbs 3 passengers	12,620 lbs 3 passengers
Maximum Speed	65 mph (electronically limited)		
Peak Power	295 HP (220 kW)		
Torque Rating (after transmission)	1823 lb-ft (2471 Nm) in 1st gear 516 lb-ft (700 Nm) in 2nd gear		
Warranty	✓ EV Conversion: Lightning eMotors standard warranty (Powertrain and battery 5 year / 60,000 miles)		
Analytics	✓ Preventive Maintenance	✓ Range Analysis	✓ Driver Behavior

* All-electric range can vary depending on route or drive cycle, environmental conditions, vehicle or equipment configurations, and driver behavior.

** Payload and passenger capacity can vary and greatly depend on vehicle wheelbase, seating configuration, and other characteristics or features as delivered by the OEM or chassis manufacturer. Equipment added to the base chassis by aftermarket upfitters or equipment installers could also affect payload and passenger capacity.
